DETAILED ACTION

Allowable Subject Matter

1. Claims 20 and 29-45 are allowed over the Prior Art of record.
2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the independent claims 20, 38 and 42 is the inclusion of the limitations of the methods steps/apparatus elements for determining the effect of a gas of interest on a product within a package that makes use of collected/stored data representing a package's total transmission of a test gas, the test gas being different than the gas of interest, the data representing storage data representing the amount of the gas of interest in the atmosphere surrounding the package during storage; the data representing the sensitivity of the product to the gas of interest or shelf life data; operating on the test gas transmission data to determine the package's transmission of the gas of interest to determine either the shelf life of the product (as in claims 20 and 38) or determining the sensitivity of the product to the gas of interest.

The closest reasonable Prior Art reference is US 2002/0194899 to Gebele et al. which teaches the use of a test gas to determine the effect of a gas of interest on a package to determine the permeability of a gas of interest.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2856

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,766,682 to Engle et al. teach the effects of a test gas on a permeable package to determine the transmission of a gas of interest.
